1. Independent claim 11.1 Novelty

D1, which is considered to be the closest prior art, discloses:

- A sun visor for vehicles, said visor having a hollow visor body and a holder for storing a flat article, there being formed in the visor body a slit-shaped receiving opening through which the article can be inserted into a receiving area arranged in the cavity

	of the visor body.

The subject matter of the present claim 1 differs therefrom in that

- the sun visor has two joined half-shells, and at least one half-shell has the slit-shaped receiving opening, the article being storable inside the sun visor by being wedged between the two half-shells.

The subject matter of the present claim 1 therefore appears to satisfy the criterion of PCT Article 33(2), because the subject matter of the only independent claim, claim 1, is novel over the prior art as defined in the Regulations (PCT Rule 64.1 to 64.3).

#### 1.2 Inventive step

Proceeding from the cited prior art, the problem addressed by the present invention can therefore be considered that of developing a sun visor as defined in the preamble of independent claim 1 in such a way as to provide the simplest possible design.

The solution defined in claim 1 does not appear to be known *per se* from any of the documents under consideration in this procedure or to be obvious from the prior art as a whole.

The subject matter of the present claim 1 therefore appears to satisfy the criterion of PCT Article 33(3), because the

subject matter of claim 1 appears to involve an inventive step (PCT Rule 65.1 and 65.2).

**2. Dependent claims 2-6**

Dependent claims 2-6, which concern further embodiments of the invention defined in claim 1, likewise appear to satisfy the requirements of PCT Article 33(2) to (4)).
